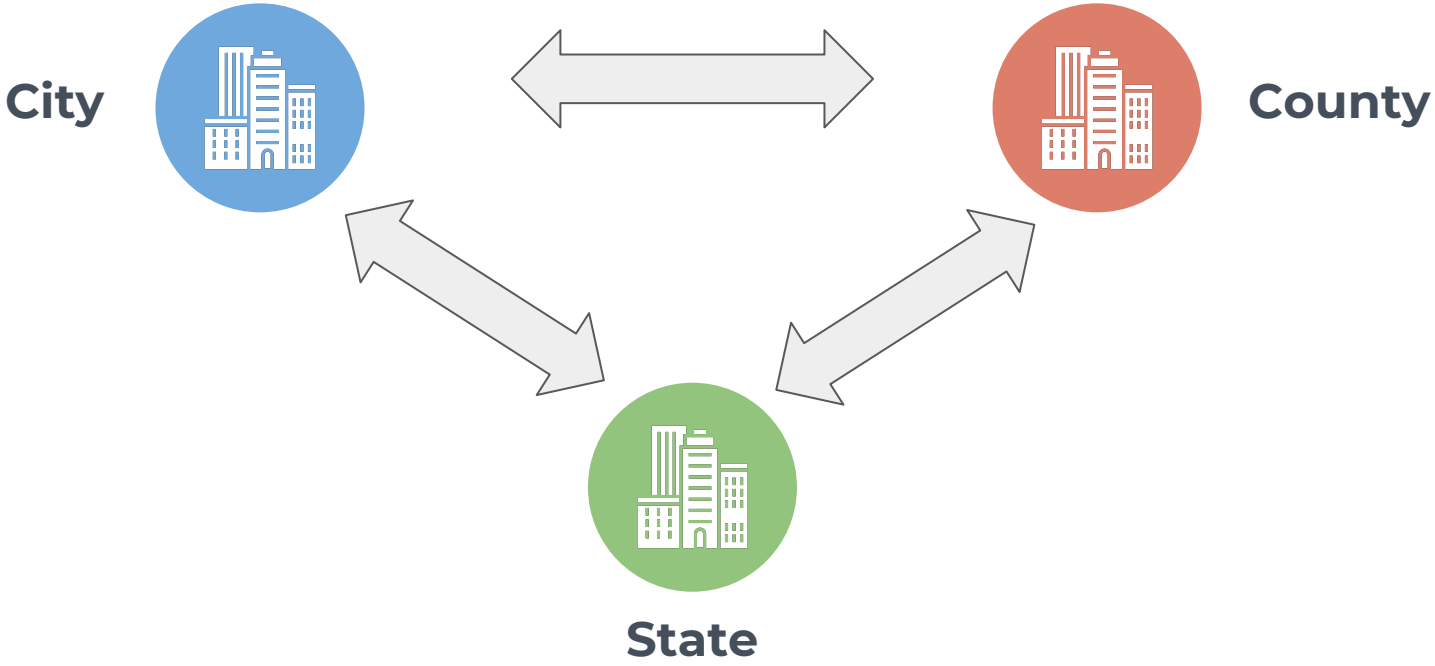
SharedStreets

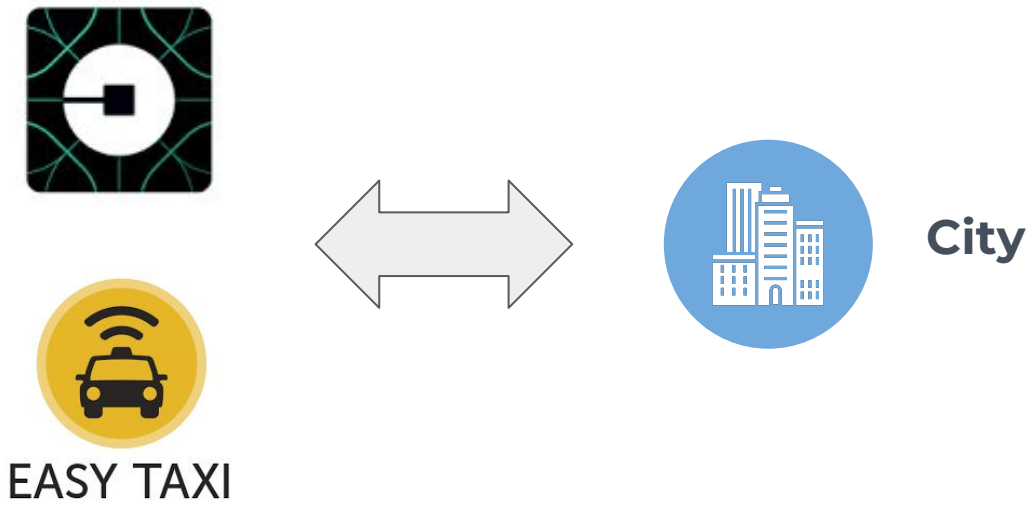
A "digital commons"
for the street

SharedStreets is a non-profit “digital commons” for the street—we’re building a universal language for communicating information about streets, and a launching pad for public-private collaboration and data exchange.

Challenge 1: cross-agency and cross-jurisdictional coordination



Challenge 2: public/private data partnerships



What does SharedStreets do?

1. Develops **data standards** for streets

2. Creates **open data infrastructure** for working with street-related data

3. Develops **replicable partnership models** for the sharing data (pub/private + intra-gov't)
