

## Third workshop of the VRUITS Interest Group

IMPROVING THE SAFETY AND MOBILITY  
OF VULNERABLE ROAD USERS  
THROUGH ITS APPLICATIONS

# Which actions should be taken regarding ITS to improve safety and mobility of VRUs?

**Tuesday, 1 December 2015 13:30-17:30**  
**Polis Office, rue du Trone 98, 1050 Brussels**

The VRUITS project, which is sponsored by the European Union's Seventh Framework Programme, aims at providing recommendations regarding ITS applications for the improvement of the safety and mobility for Vulnerable Road Users (pedestrians, cyclists, PTWs, special user groups, elder drivers). The VRUITS project has assessed the societal impact of various ITS applications, and has piloted innovative ITS applications in the Netherlands and in Spain. Starting from the results of the assessments and the pilots, the project will make recommendations for policy and industry regarding ITS in order to improve the safety and mobility of VRUs.

The project invites experts in the field of ITS and representatives of authorities to participate in a workshop to discuss the possible actions and recommendations in order to select the most appropriate measures which improve safety and mobility of VRUs. The workshop is targeted at local authorities, ITS suppliers (in-vehicle and infrastructure), road safety organisations, bodies representing cyclists and pedestrians, etc.

The VRUITS workshop is organised back-to-back with a workshop on cooperative ITS in cities organised jointly by the CODECS and CIMEC projects.

Draft Agenda	
13:30 - 13:40	Introduction to the VRUITS project, Johan Scholliers/VTT
13:40 - 14:10	Overview of the assessment results of the VRUITS project
14:10 - 14:30	Vehicle Safety Advancements in London, Simon Bradbury & Naomi Baster, Transport for London
14:30 - 16:30:	Workshop in Groups to discuss identified barriers/actions & priorities
16:30 - 16:45	Coffee break
16:45 - 17:15	Conclusions per Group and final discussions on short list of actions
17:15 - 17:30	Summary
17:30	Closure & networking drinks
