

# Safer City Streets

The global traffic safety network for liveable cities

Alexandre Santacreu

# **Intergovernmental Organisation**

57 member countries

## **Think Tank**

Policy analysis  
Research  
Statistics

## **Annual Summit**

Forum for Ministers, industry  
"The Davos of Transport"

# Safe System Implementation

- ITF working group report (29 members)
- Released Oct 2016

# International Traffic Safety Data and Analysis Group

International Traffic Safety  
Data and Analysis Group

# IRTAD Outputs

- Network and conferences
- Publications
- Twinning projects with new countries

Data and Analysis Group  
Research Report

# Safer City Streets

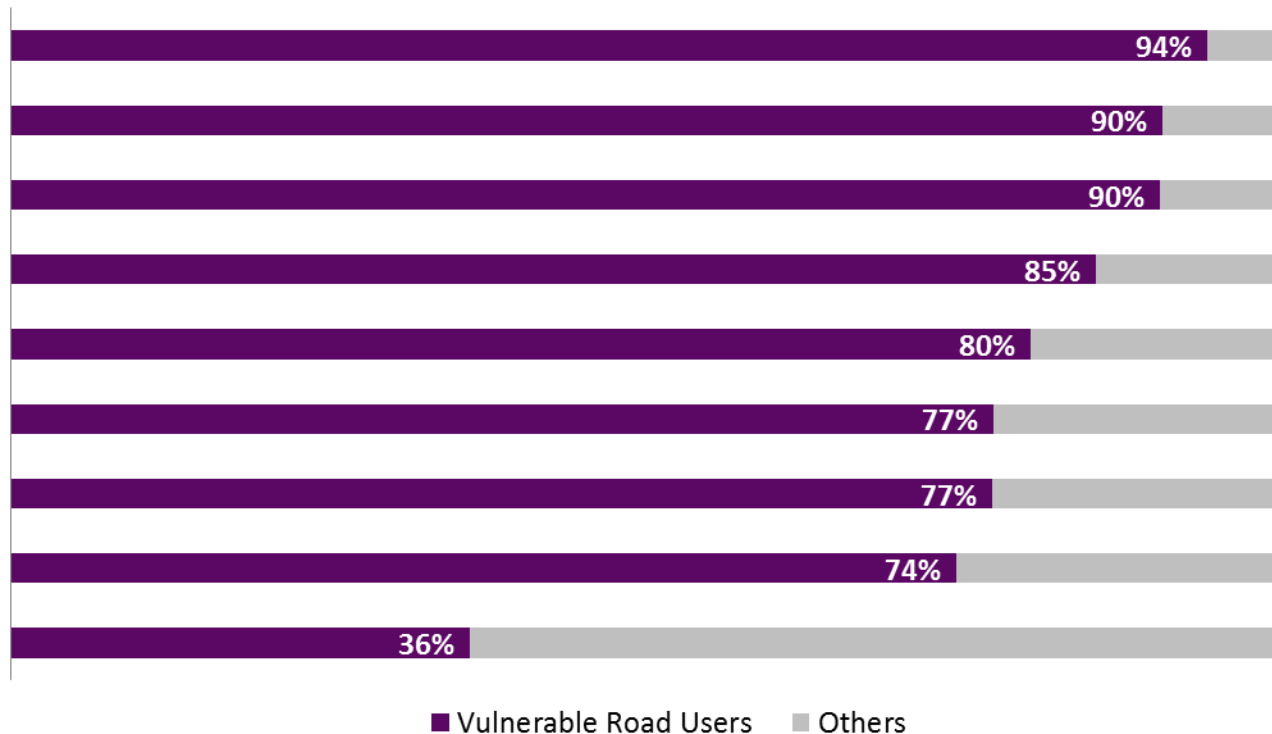

*the global traffic safety network  
for liveable cities*

- A solution to better collect and analyse road safety data
- A key to design and evaluate policies
- Main features:
  - A network of experts
  - A global database

## Vulnerable road users fatalities in nine cities

2013-2015

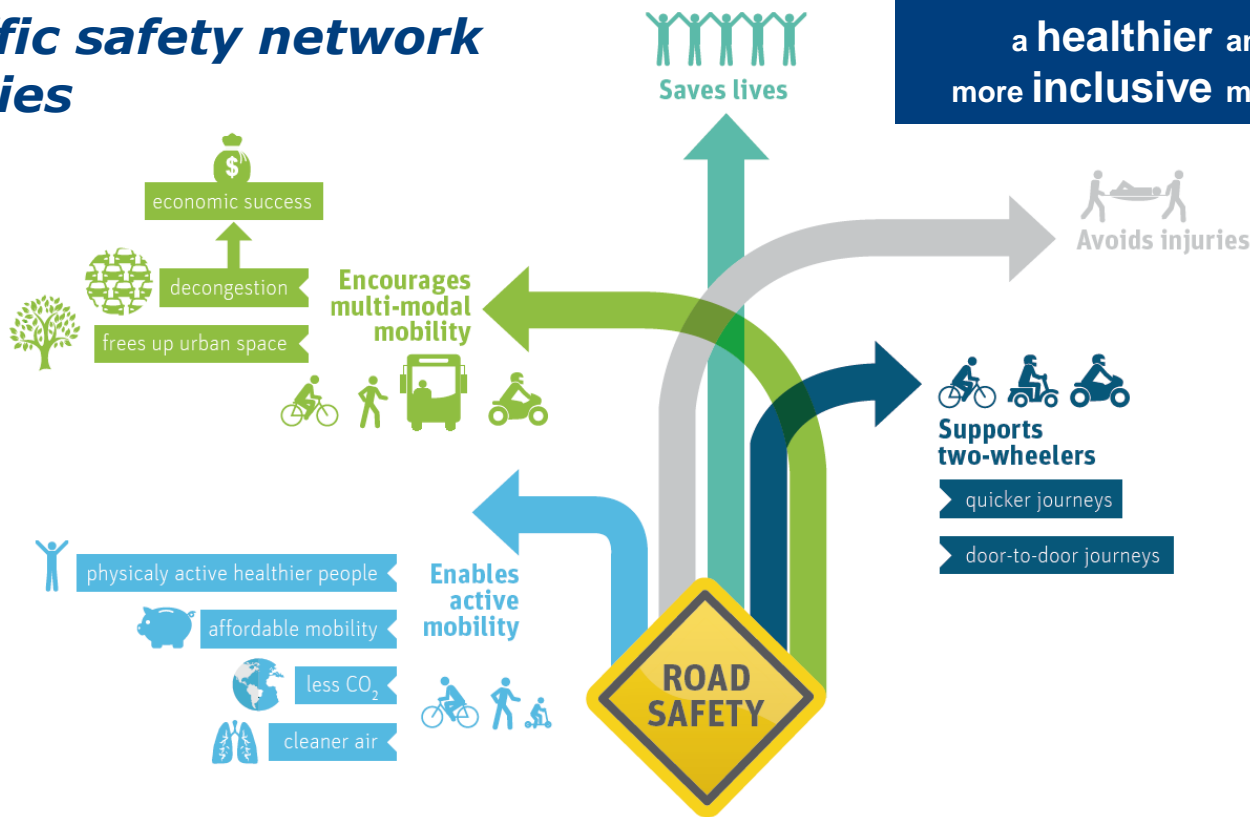

pedestrians,  
pedal cyclists,  
motorcyclists

# Safer City Streets

*the global traffic safety network  
for liveable cities*

1 person dies  
**every minute**  
in world cities

road safety in cities can

# unlock

a healthier and  
more inclusive mobility

# Pilot stage

- 9 cities  
Bogota, Barcelona, Lyon, London, Paris, New York,  
Chicago, Lisbon, Copenhagen
- A proof of concept
- A sustained level of interest
- Key to define **priorities** and unlock  
**support**

# Safer City Streets

*the global traffic safety network  
for liveable cities*

- **Priority work areas**
  - Vulnerable road users
  - Data on serious injuries
  - Data on mobility and traffic
- **Supporters**
  - IRTAD
  - FIA

## Results from the online survey (n=18)

« *learn from  
each other* »

---

#1 priority for most  
cities

100%

---

of cities say they would  
consider making  
crash data

**open data**

to facilitate data  
collection

Casualties by  
**mode**  
per  
unit travel

---

voted best  
**performance  
metric**

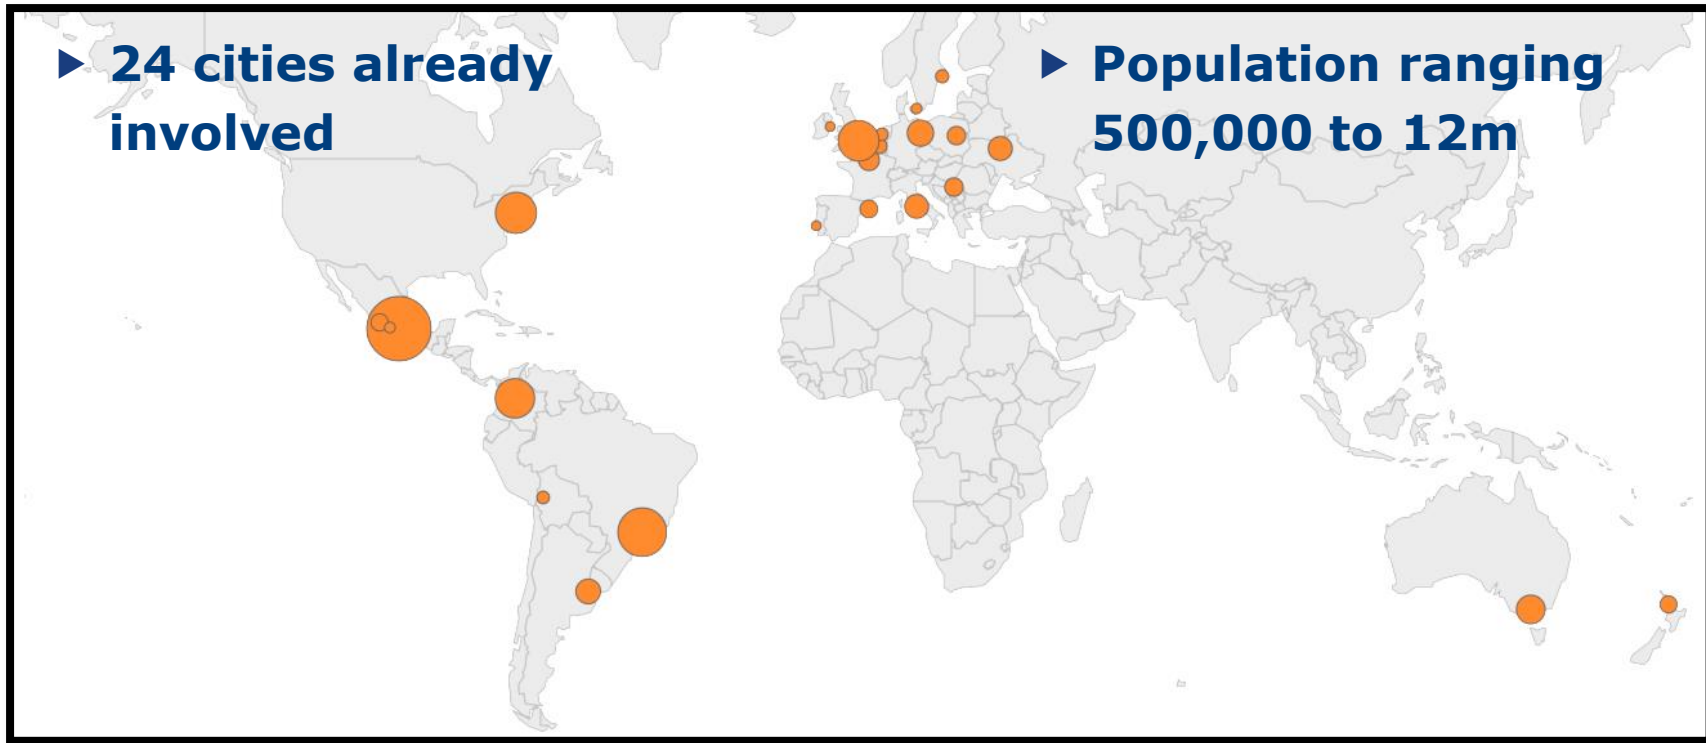

# Safer City Streets

*the global traffic safety network for liveable cities*

► 24 cities already  
involved

► Population ranging  
500,000 to 12m

# Methodological framework

*published Oct. 2016*

1. Review of international activities on urban traffic safety
2. Overview of data challenges in urban areas
3. Define the overall scope of the project
4. Data needs
5. Structure of the database
6. Identify areas for common road safety data analysis
7. Criteria for city groupings options

# Safer City Streets - Milestones

October 2016

official launch of the project at the UN conference Habitat III

November 2016

operational database, with access for member cities

OECD.Stat

April 2017

first meeting of the group

April 2017

analytical report is delivered to cities

May 2018

highlight of the ITF Summit

## Fatality risk in cities

fatalities per 100,000 inhabitants, 2013-2015

Road risk  
in cities  
is typically  
**lower**  
than outside

## Fatality risk by mode

fatalities per billion passenger-kilometre, 2012-2014  
averaged across Auckland, Barcelona, London

**P2W riders**  
have a fatality risk

**5x**

that of pedal cyclists

**Pedestrians**  
have a fatality risk

**20x**

that of car passengers
