Important day for MaaS!

Deadline today!!!

Revision of the ITS directive: consultation open!

Intelligent transport systems improve safety, traffic efficiency and driver comfort by helping people take the right decisions and adapt to traffic situations.

EU rules aim to accelerate and coordinate the deployment and use of these systems.

This revision will assess the availability of infrastructure and traffic/travel data across the whole EU transport network.

It will also cover new developments such as:

- connected and automated mobility (e.g. self-driving vehicles)
- **online platforms allowing users to access several modes of transport.**
