

Managing e-scooters

Mobility Agency – Shared Mobility - DVD

Micro Mobility - Timeline of actions taken by the City

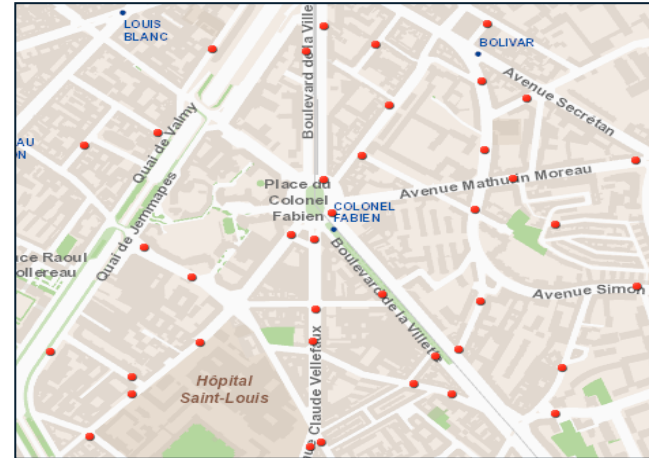

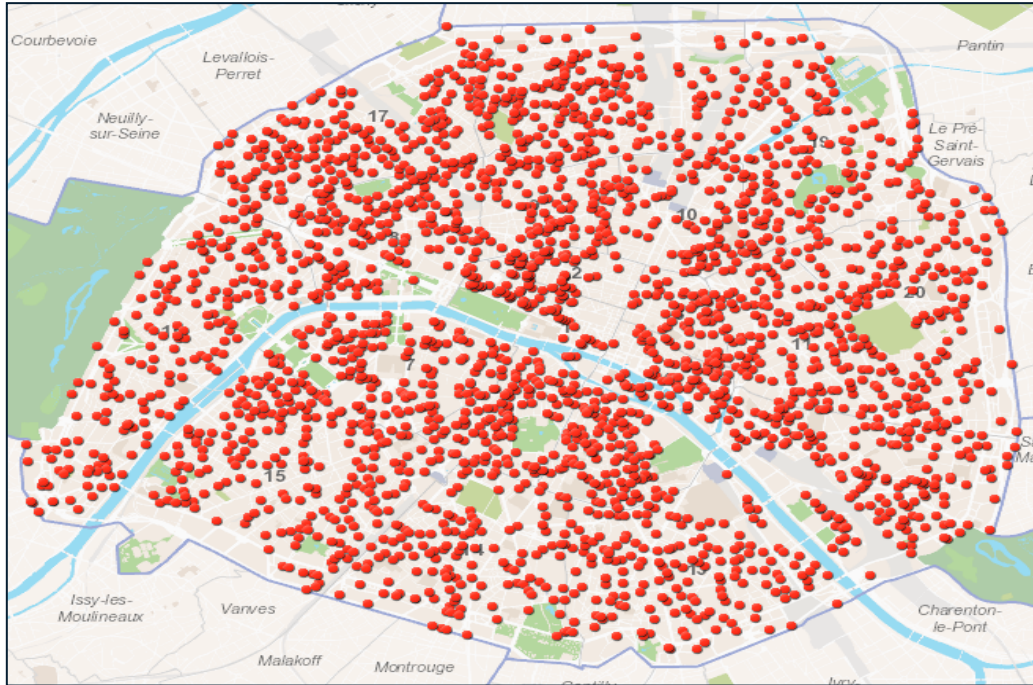

Welcome, dialogue and regulate private fleets

*The LOM not only seeks to reduce CO2 emissions by decreasing car ownership, encouraging "greener" forms of mobility such as cycling and empowering cities through the creation of new, local authorizing bodies but also to facilitate the operation of new mobility businesses in France.

E-scooters : 2500 new parking spots available from 2020

> 6 parking places for each spot : up to 15000 parking places

The electric scooters can no longer be parked wildly on pavements. They must be parked on these zones.

No parking spots in central and pedestrian areas

Merci
