

Accelerating new mobility: bringing it forward

# ***Mobility as a Service in Paris & Île-de-France Region***

-

## **2020 Annual POLIS Conference**

Session 7B “Mobility as a Service ”

Wednesday 2<sup>nd</sup> December

## Key Figures

- **12.3 million inhabitants**, almost 20% of the French population
- An area of **12,012 km<sup>2</sup>** (77% of which is rural)
- **31% of the GNP & 4.6% of the EU GDP** (ahead of Greater London and Lombardy)
- No. 1 employment catchment area in Europe & 2<sup>nd</sup> largest place for major companies (worldwide)
- No. 1 tourist destination worldwide (46 million visitors)

## Daily travel within Île-de-France

- **43 millions trips per day including all modes of transport** (source: 2018 Mobility Survey)
- **9,4 millions trips per day in public transport (+14% compared to 2010)**
- 70% of those trips are made outside Paris. The trips between Paris and the suburbs represent only 10% of all daily trips

## Mobility as a Service is a key enabler for Île-de-France Mobilités to achieve its strategic objectives

1. **Improve services to travellers** with a seamless and personalized experience
2. **Improve customers and behaviour insights and knowledge** to better guide public mobility policies
3. **Promote innovation** for sustainable and inclusive mobility

# MaaS brings new opportunities for many private and public actors, which creates much complexity

# To organize this complex ecosystem and spread good practices, Île-de-France Mobilités has thus decided to built a Reference Guide on key subjects, based on external consultation

## Mobility offers

- ✓ Organize multi ad intermodality
- ✓ Promote sustainable and inclusive mobility

## Media and traveler's Information

- ✓ Propose a public MaaS App for Paris Region
- ✓ Guarantee the reliability of travellers' information

## Innovation

- ✓ Organize and participate to innovation events and competition
- ✓ Promote sharing innovation

## Data and services

- ✓ Accelerate data opening and sharing, and develop accessible and reusable digital services
- ✓ Positioning IDFM as a trusted third party

## Pricing and distribution

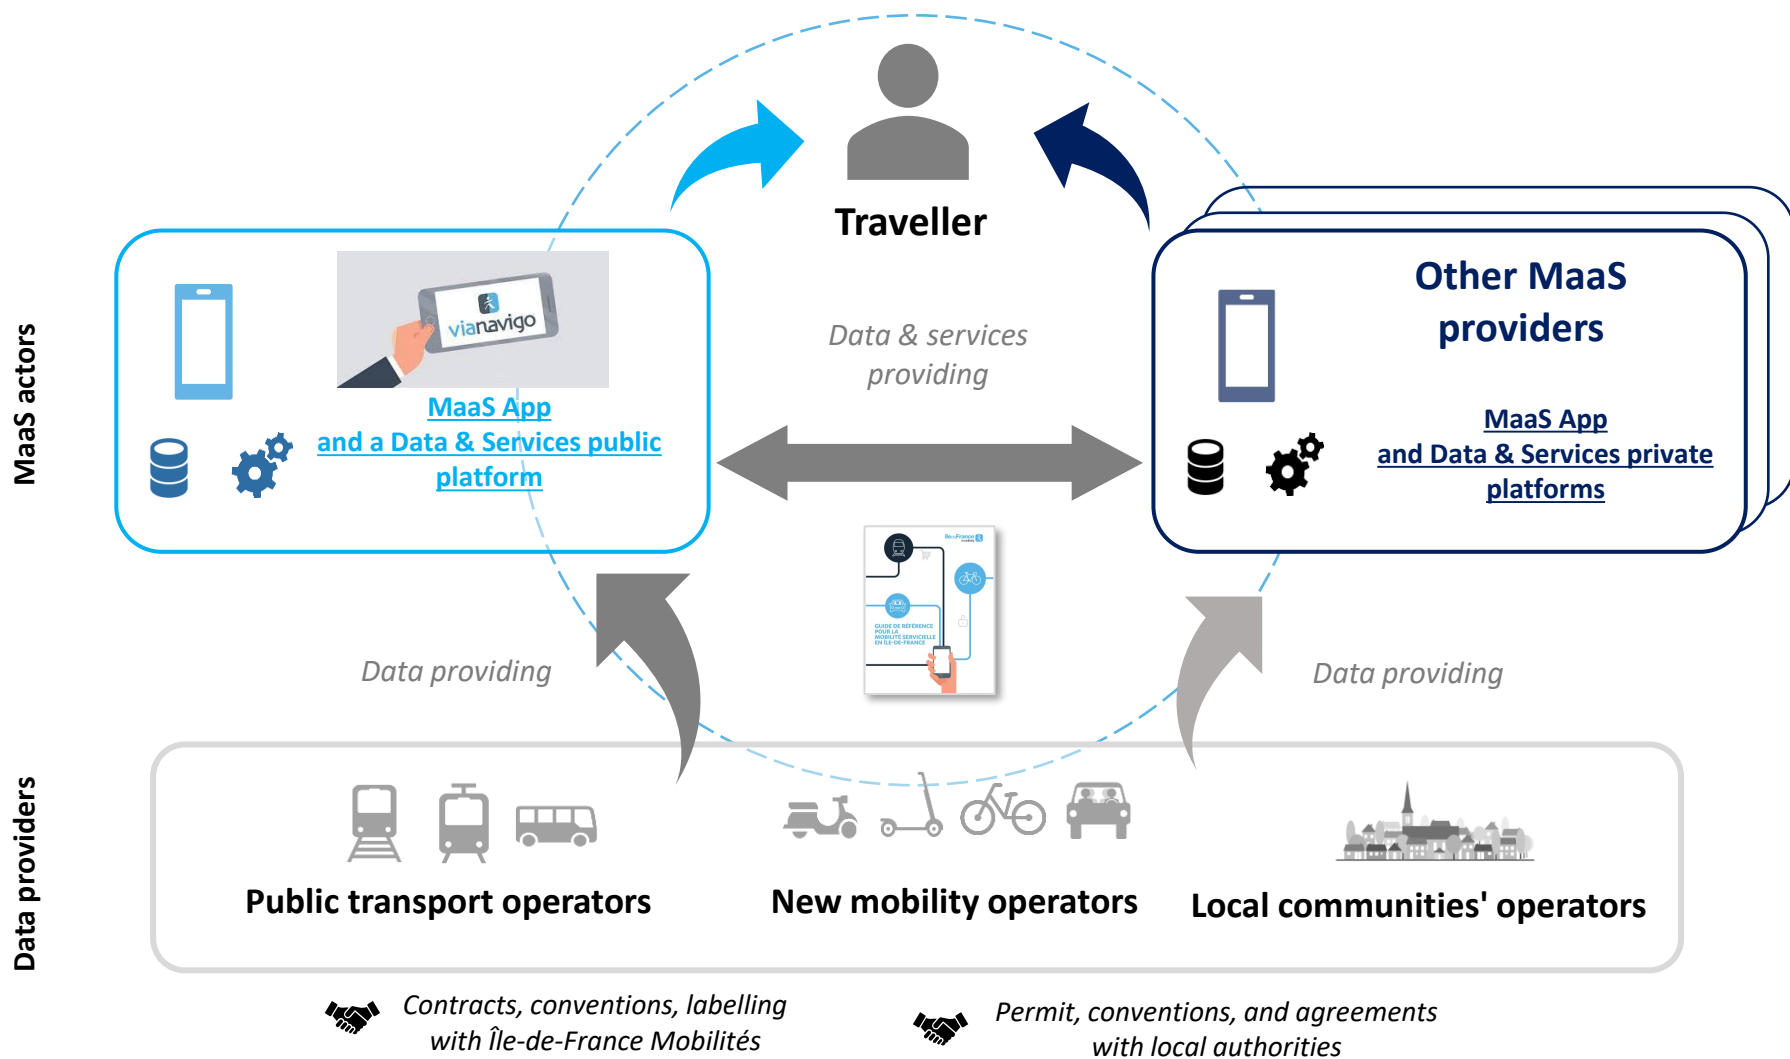

- ✓ Guarantee the comprehensibility and the completeness of offers
- ✓ Ensure the best user experience

## Governance

- ✓ Establish a co-constructive approach
- ✓ Organize multilateral meeting with stakeholders

This reference guide is a first collaborative step to regulate and coordinate the regional MaaS ecosystem relationships

## The MaaS App of Île-de-France Mobilités will cover different modes of transport when integrating R&D projects and third-party application

Services available

Innovation project

Independent App

## Case study : a R&D project to promote innovation & improve our MaaS strategy

1. R&D to test and develop innovative solutions for the MaaS users
2. Working with the private sector to help develop those innovations
3. When the experimentation has been assessed, we work on an integration in our MaaS platform

**THANK YOU**
