parcels delivered per day

11 B

euros revenue
+42% growth revenue vs. 2019

97,000

delivery experts

Better air quality for your city

Air Quality Monitoring Programme

Monitoring of PM 2.5

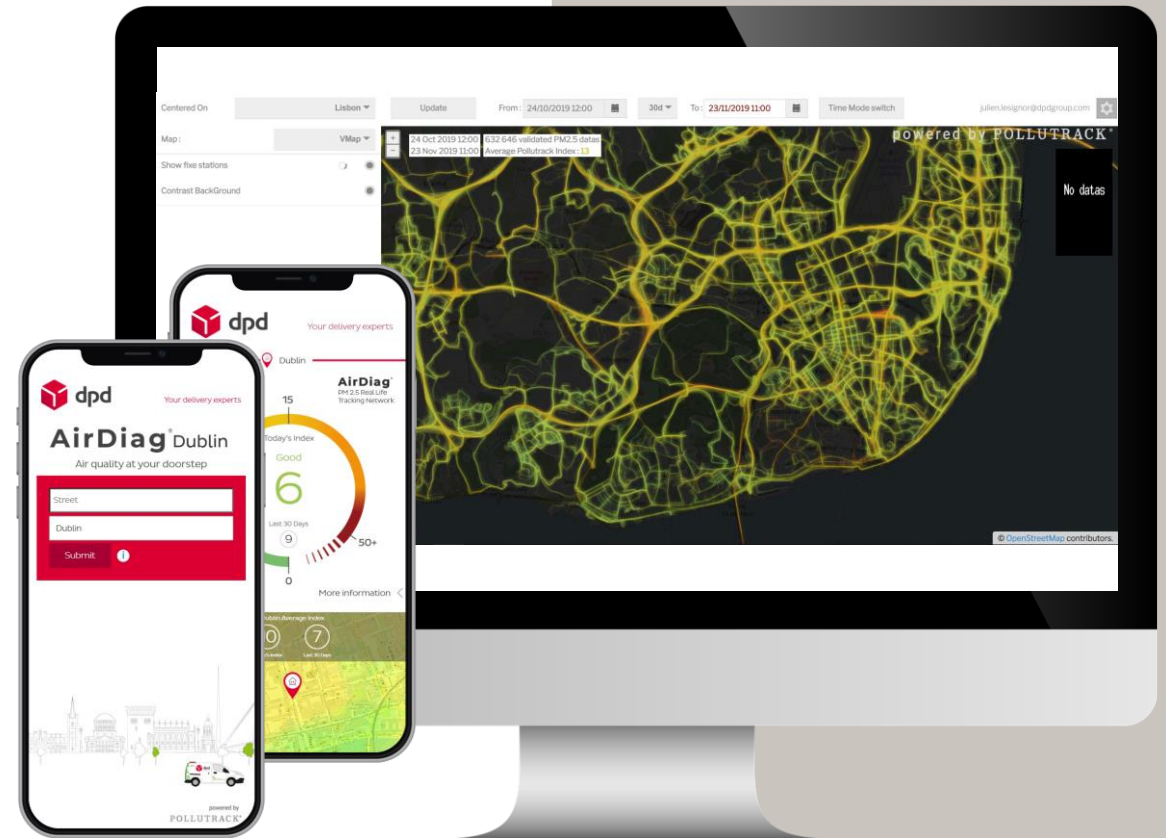

Real time air quality monitoring to be deployed in 20 EU cities by 2021

With next generation sensors on our delivery vehicles and city locations

The website AirDiag™ available for city authorities and citizens/consumers

Affect change

Tools and insights to help you

1. A live air quality dashboard for one year*

2. One year of PM 2.5 pollution data

3. One initial air quality analysis report performed by Pollutrack** experts

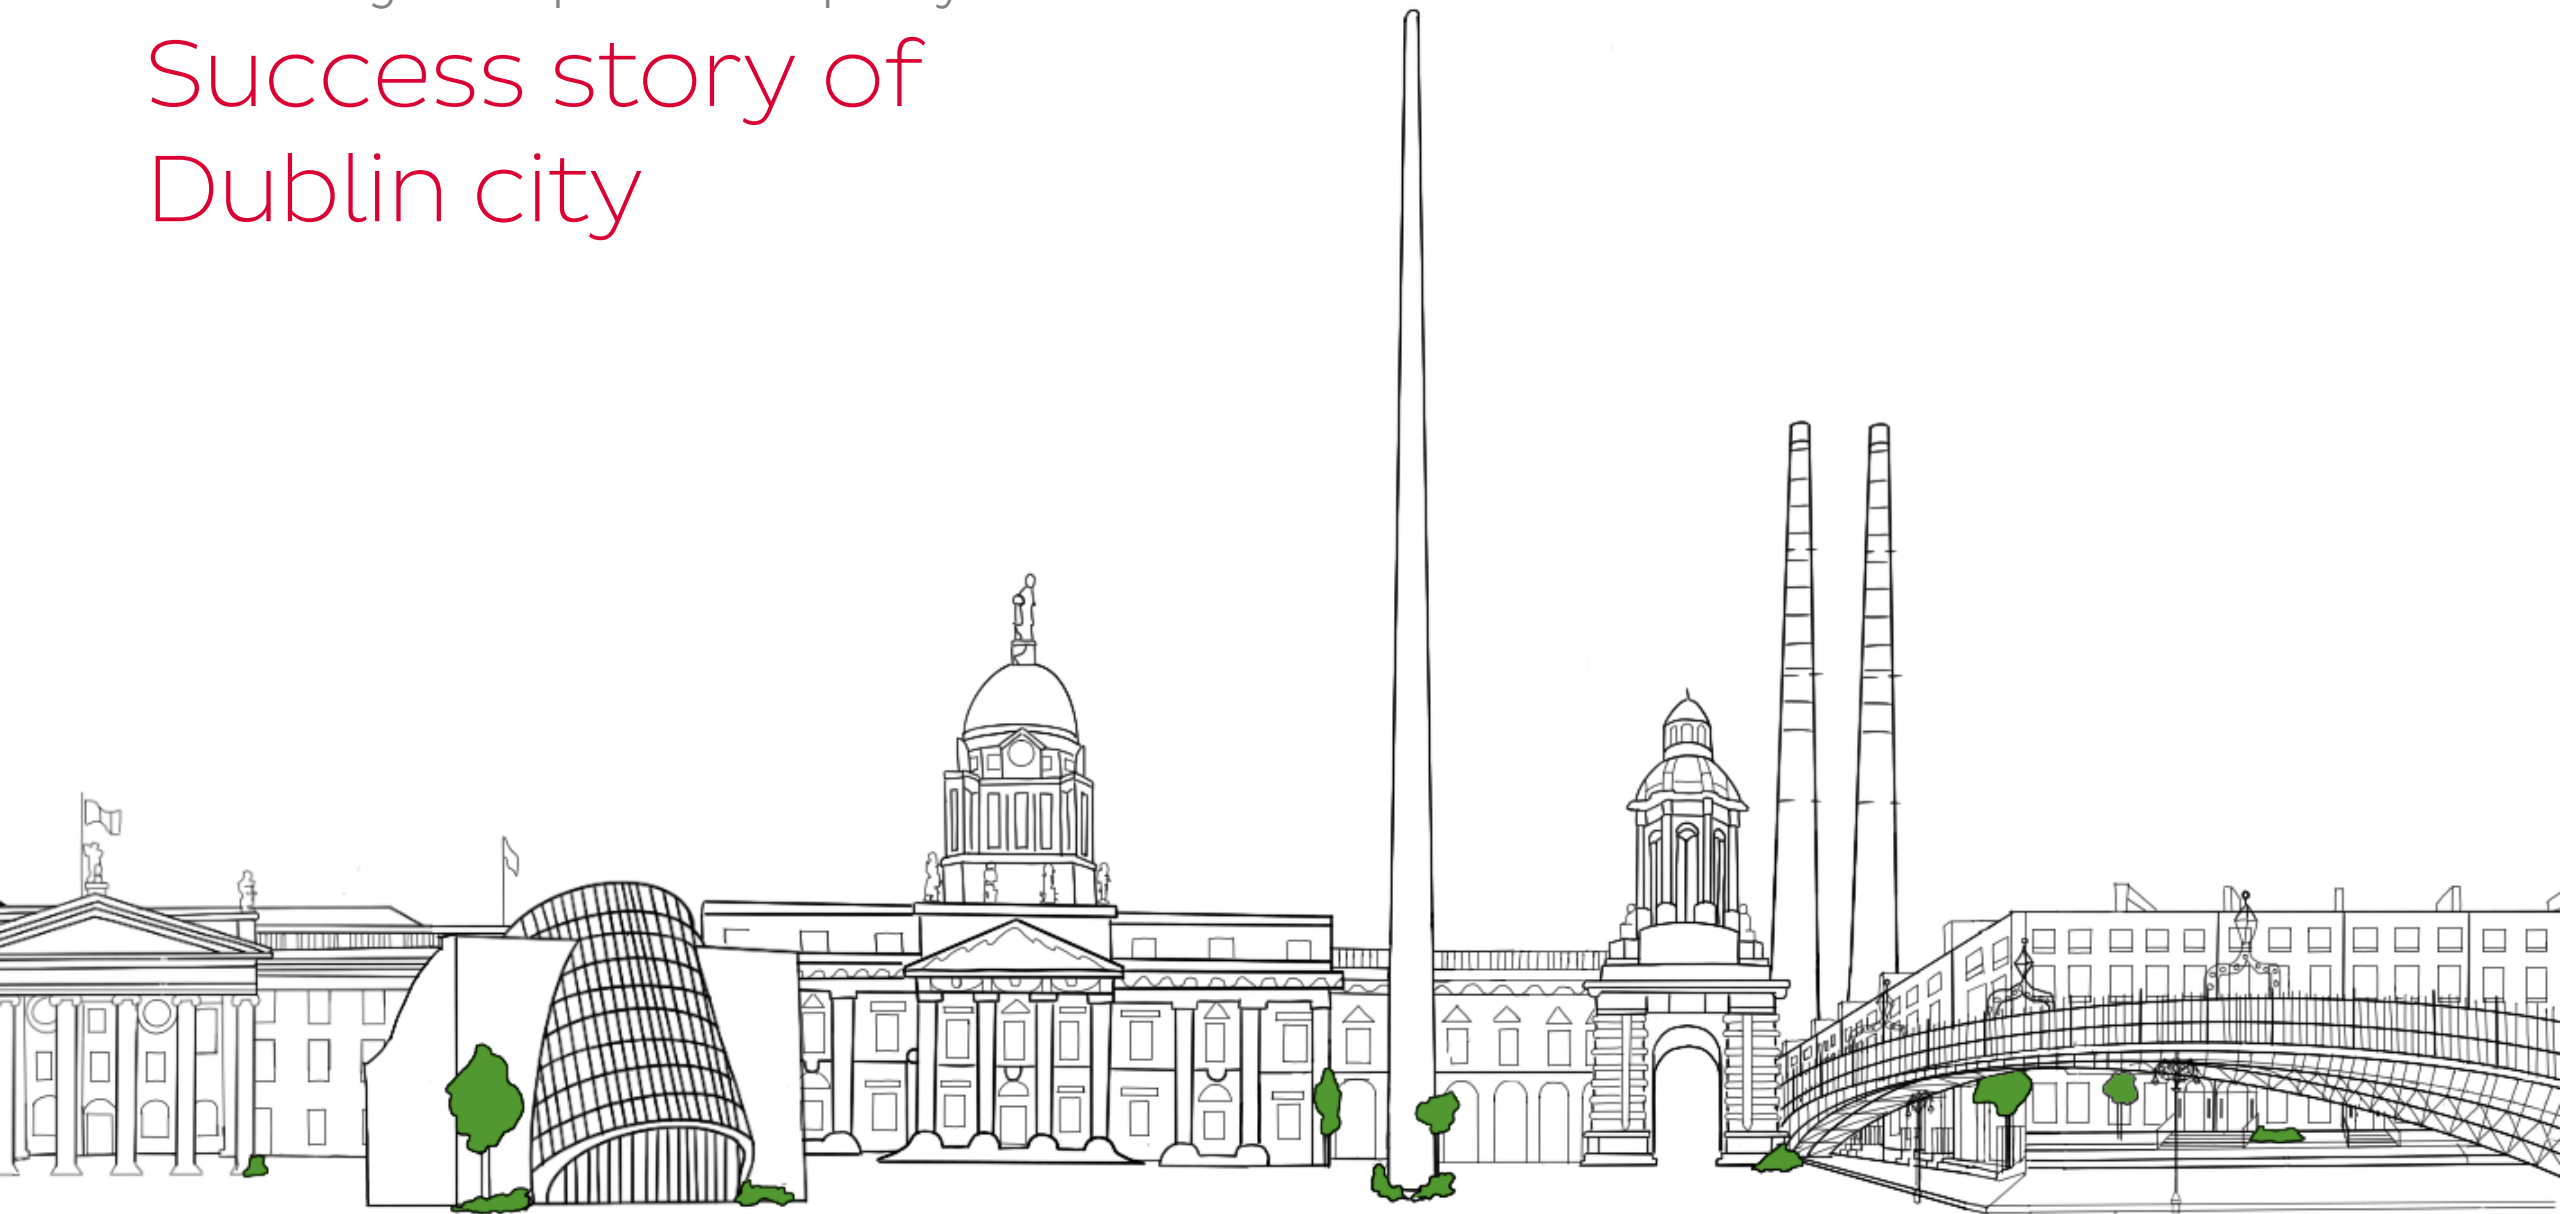

4. A dedicated air quality monitoring website AirDiag™ that is accessible by the general public

Partnering for improved air quality

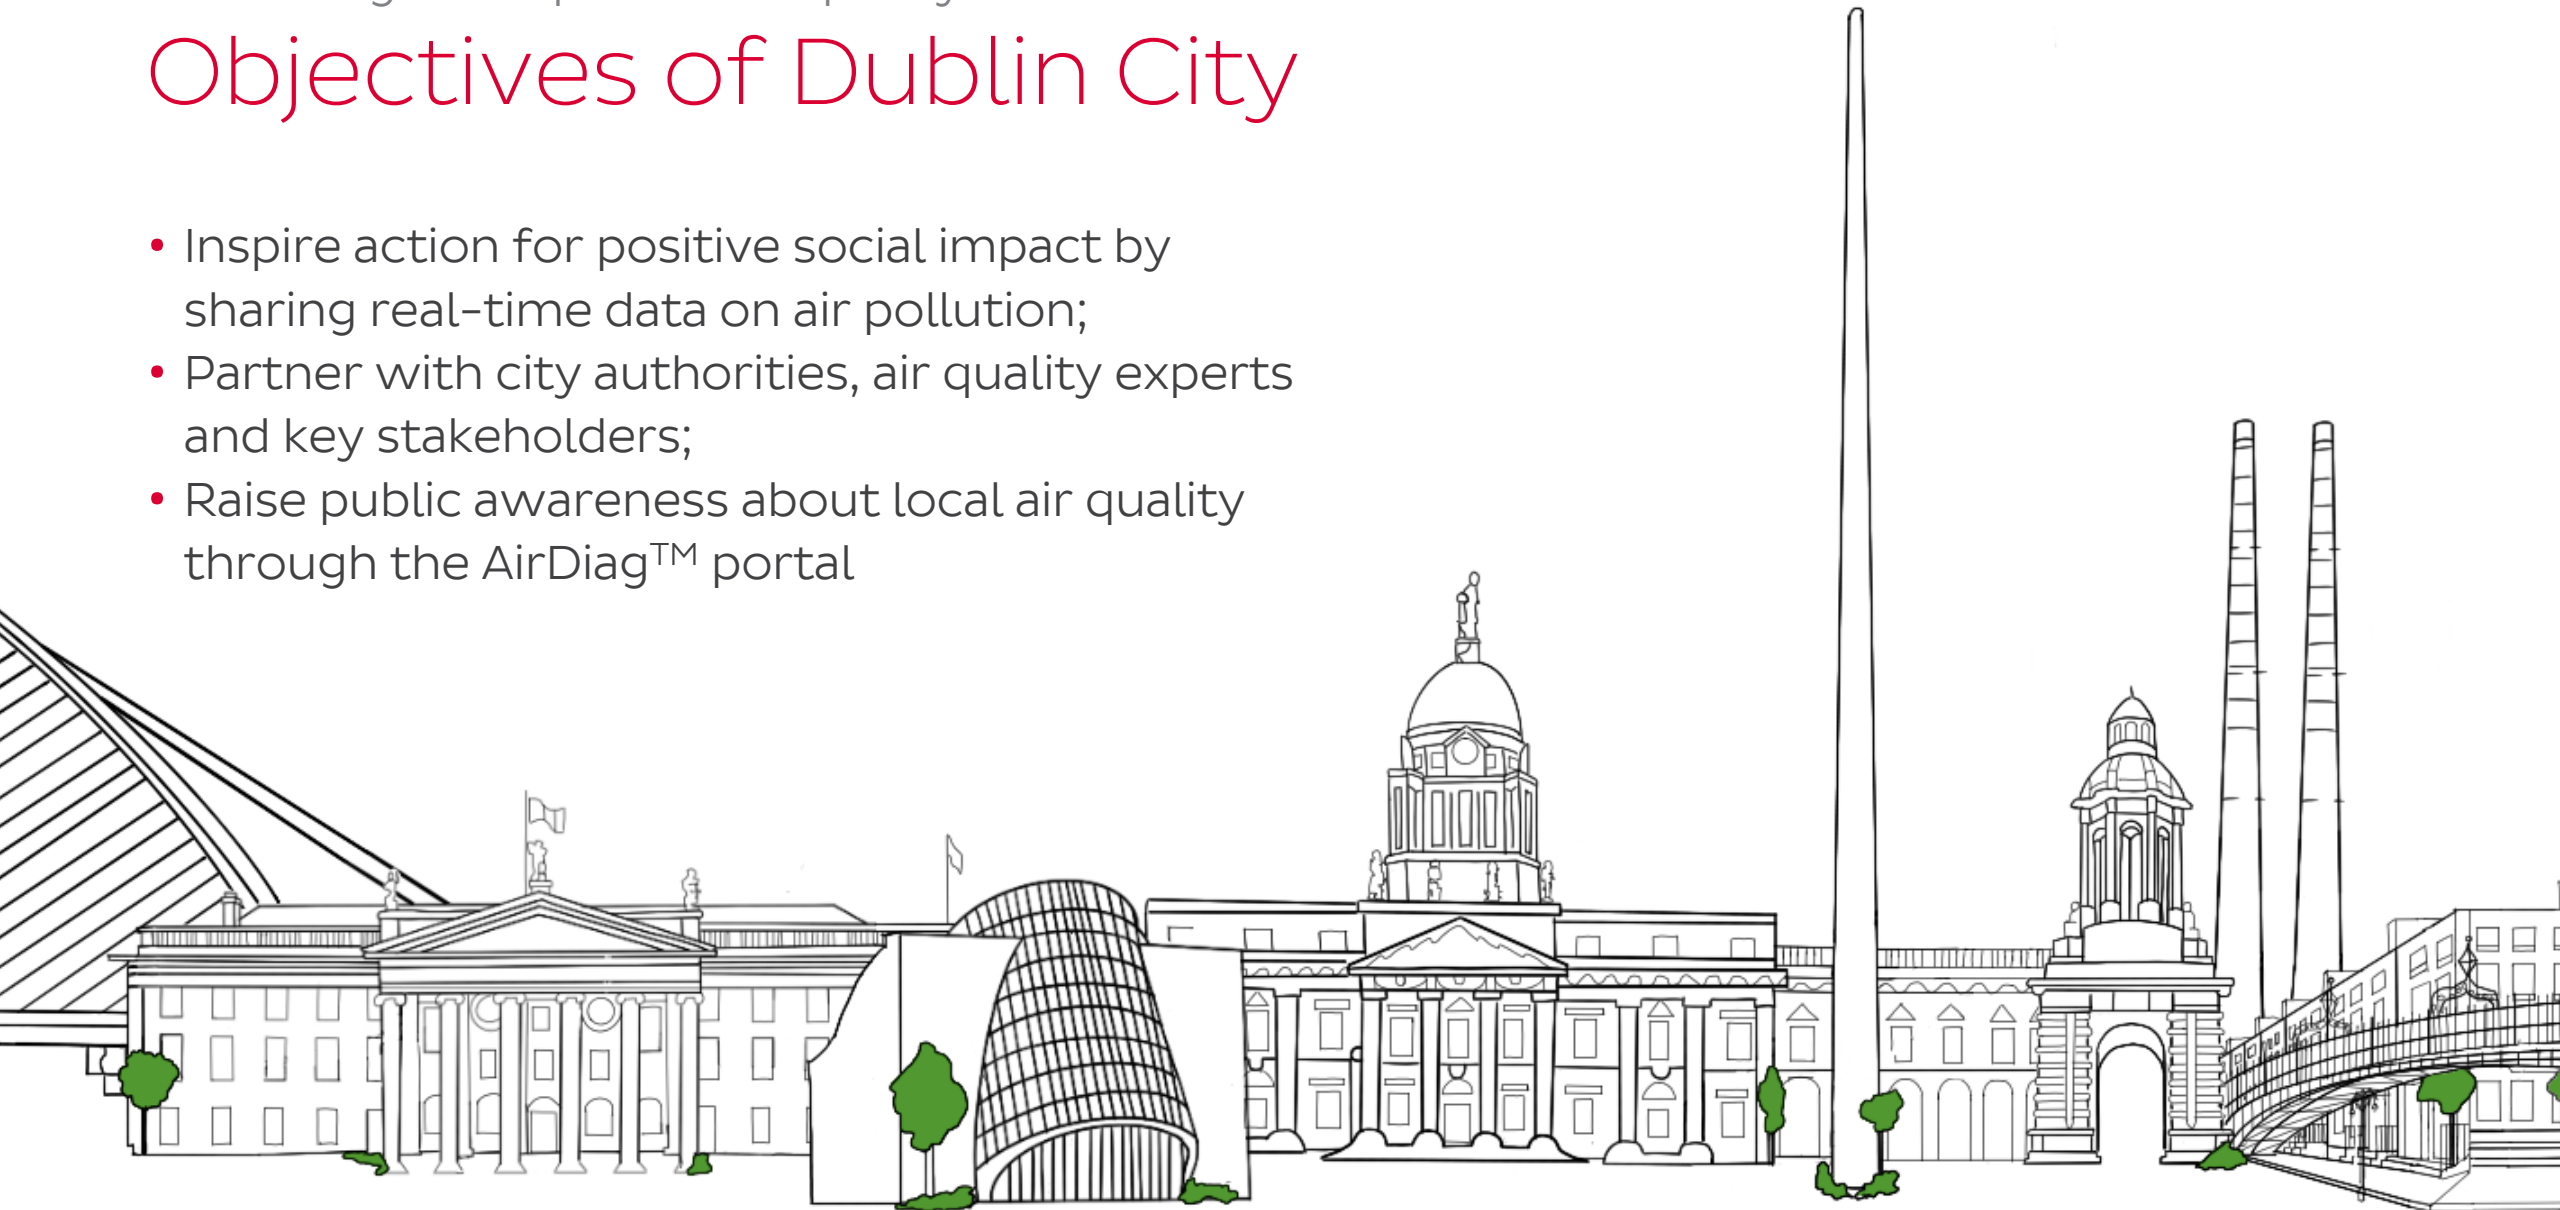

Success story of Dublin city

Partnering for improved air quality

Objectives of Dublin City

- Inspire action for positive social impact by sharing real-time data on air pollution;
- Partner with city authorities, air quality experts and key stakeholders;
- Raise public awareness about local air quality through the AirDiag™ portal

The ecosystem of partners with DPDgroup and Pollutrack

Many partners, one common goal

Partnering for improved air quality

Using the data to inspire action

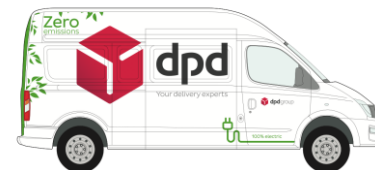

Installation June 21st -30th 2021

Mobile sensors on 102 DPD delivery vehicles

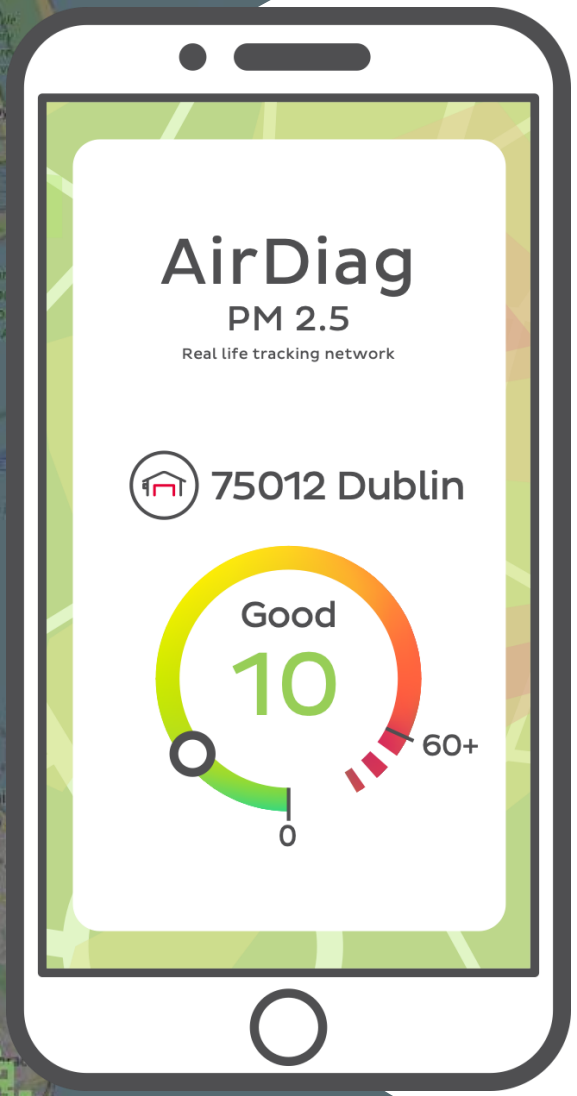

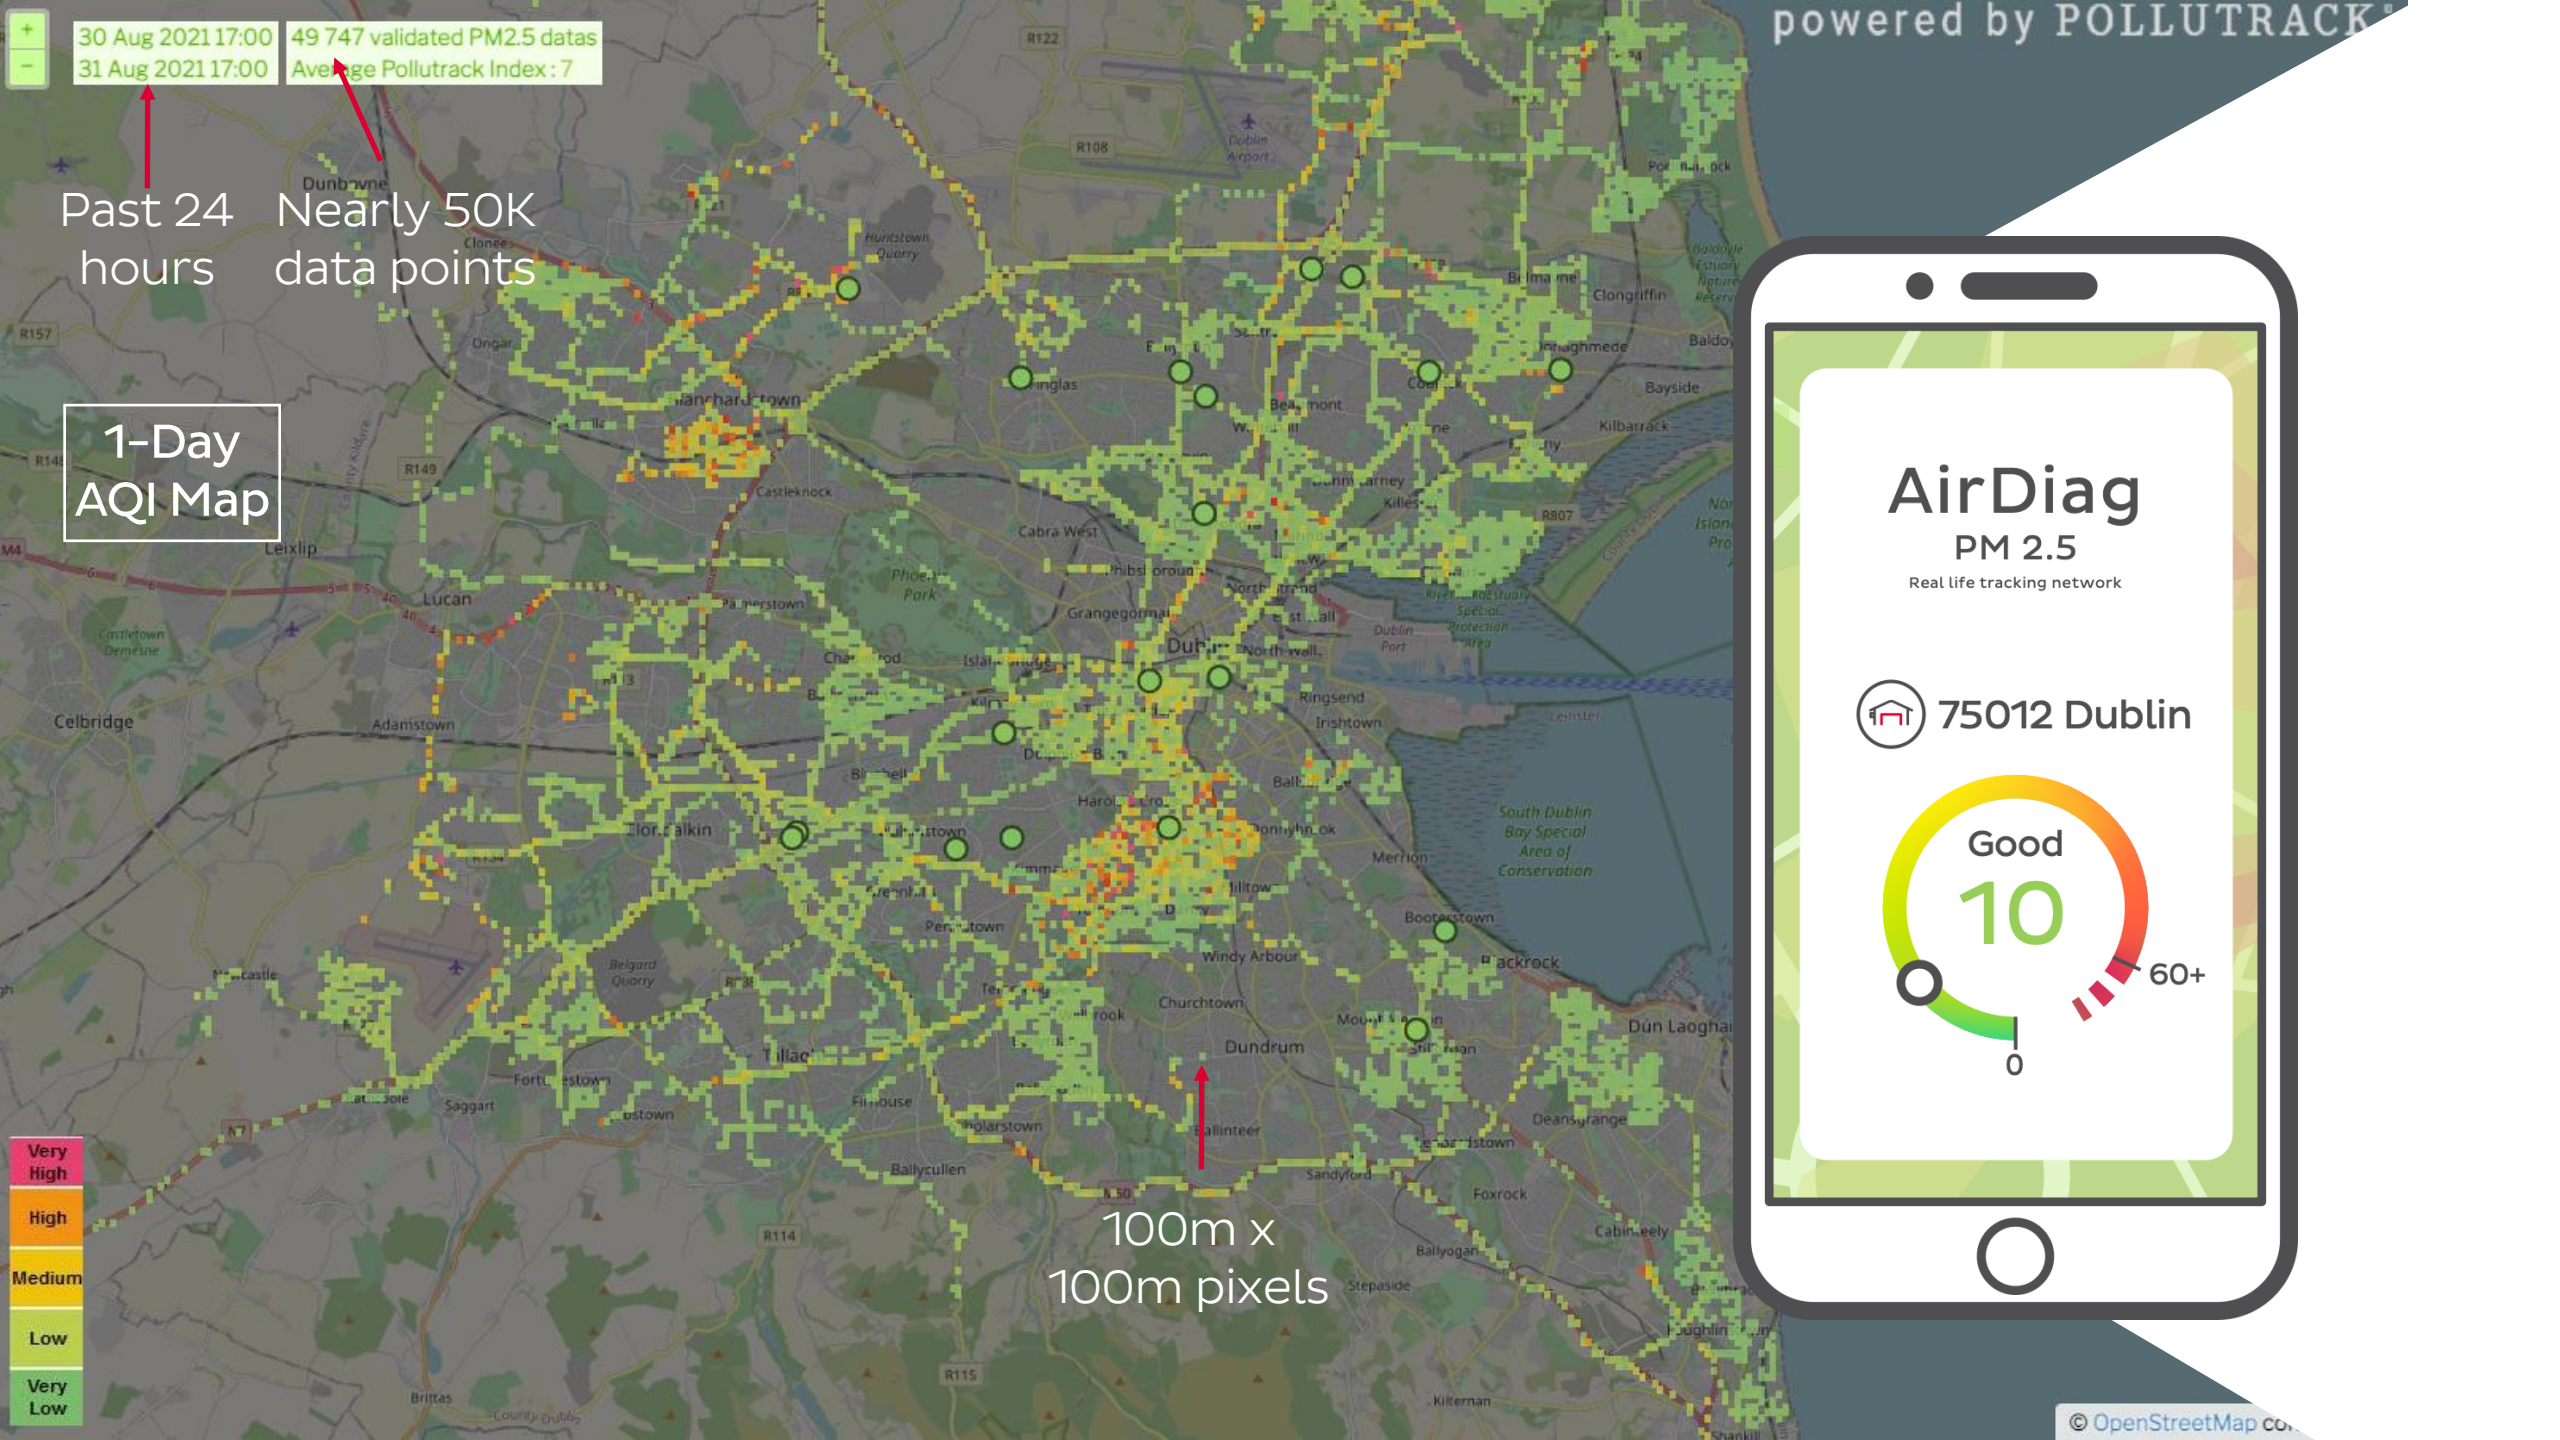

Fixed sensors on 22 Dublin fixed sites inc. depots and partner locations

30 Aug 2021 17:00
31 Aug 2021 17:00
49 747 validated PM2.5 datas
Average Pollutrack Index : 7

Past 24 hours
Nearly 50K data points

1-Day
