# Interventions in public space

# Sence of urgency!!

# Climate crisis

Growing city

Quality of life is under presure

# Sustainable Urban Mobility Plan 2021

Well on our way

In our new SUMP, once again, we take our mobility policy one step further

1. Choose for Living environment

Reduction in dominance of car traffic in public space

2. Change travel behaviour

Transition to less, space efficient, clean and healthy transport.

## Say farewell to car-based street design

# Say farewell to car-based street design

2021: 2040:

Een straat waar de autologica de uitgangspositie is.

Een straat waar afscheid is genomen van de autologica.

#### **The Fordable City**

#### **Transit oriented development**

**Leading by example** 

Stimulate the use of parking garages and P&R

**Bicycle parking** 

**Cycling City Groningen 050** 

Car parking

**Public transport** 

**Chainmobility and hubs** 

**Traffic Management and Smart Mobility** 

Zero emission and street-friendly logistics

**Discourage car traffic at schools** 

More attention for pedestrians

# FROM 1 TO 10 DIMENSIONS

#### THE 10 DIMENSIONS OF THE STREET

#### Questions for the break-out session

en Boer

Do you have experience in your city / region with shifts to other transport modes?

What are necessary conditions for the desired shift to other transport modes?

Should everybody pay for parking their cars in public space?

Would a bottom-up approach work for your city / region?

What are the risks of a bottom-up approach?
