Zero Emission mobility made inclusive!

The challenges and successes in the city of Rotterdam

Cindy Welters, Sustainable Mobility Advisor

Personal connection

- Passion for sustainability
- Making the world bigger for people with a physical or mental disability
- Working from experience!

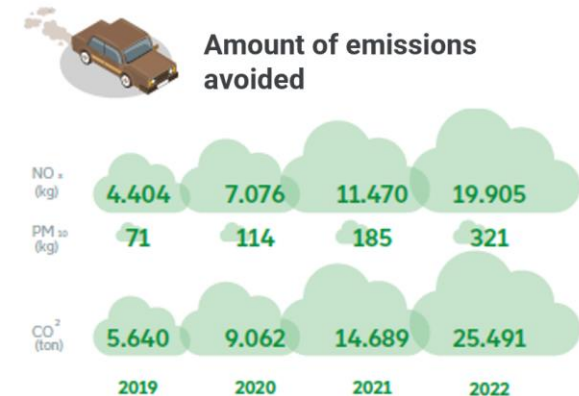

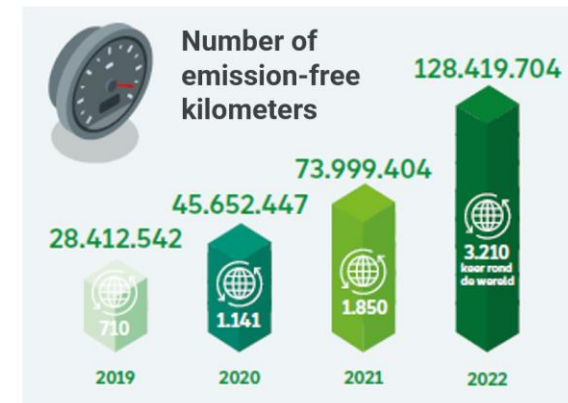

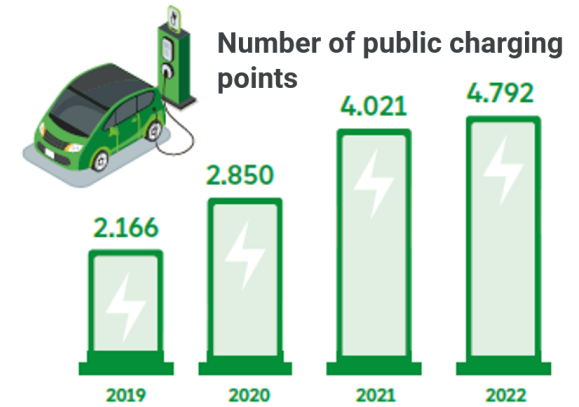

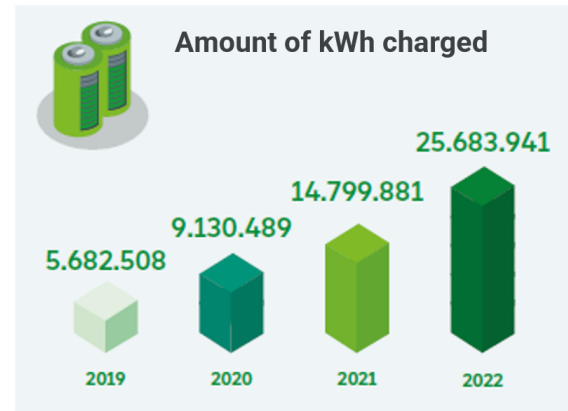

“My approach as an advisor is to look at what is possible, instead of being discouraged by what is not possible”

Rotterdam approach to Zero Emission Mobility

- Achieve the national standard of -55% CO2 reduction in 2030
- e-Visionary Award & 'Most EV-friendly municipality' in the Netherlands
- 4% of rides are electric

Trevvel

- Travel from A to B with clean special transport services
- 58-62% Zero Emission kilometers in 2022
 - All conventional vehicles are 100% ZE
 - No solution yet for multi-wheelchair vehicles
- Arranging sufficient charging network: Private and public charging points combined!

Buzz10

- All available rides were used up in the school year 2022-2023!
- Started in Rotterdam: recently expanded to Schiedam, Vlaardingen and Maassluis
- Combining achieving zero emission goals, combating transport poverty and making mobility inclusive!
- First 100% Zero Emission Touringcar in the Netherlands
