Air quality in the Ile-de-France transport network

Improving air quality in transport is a public health issue, both for
users and operator employees

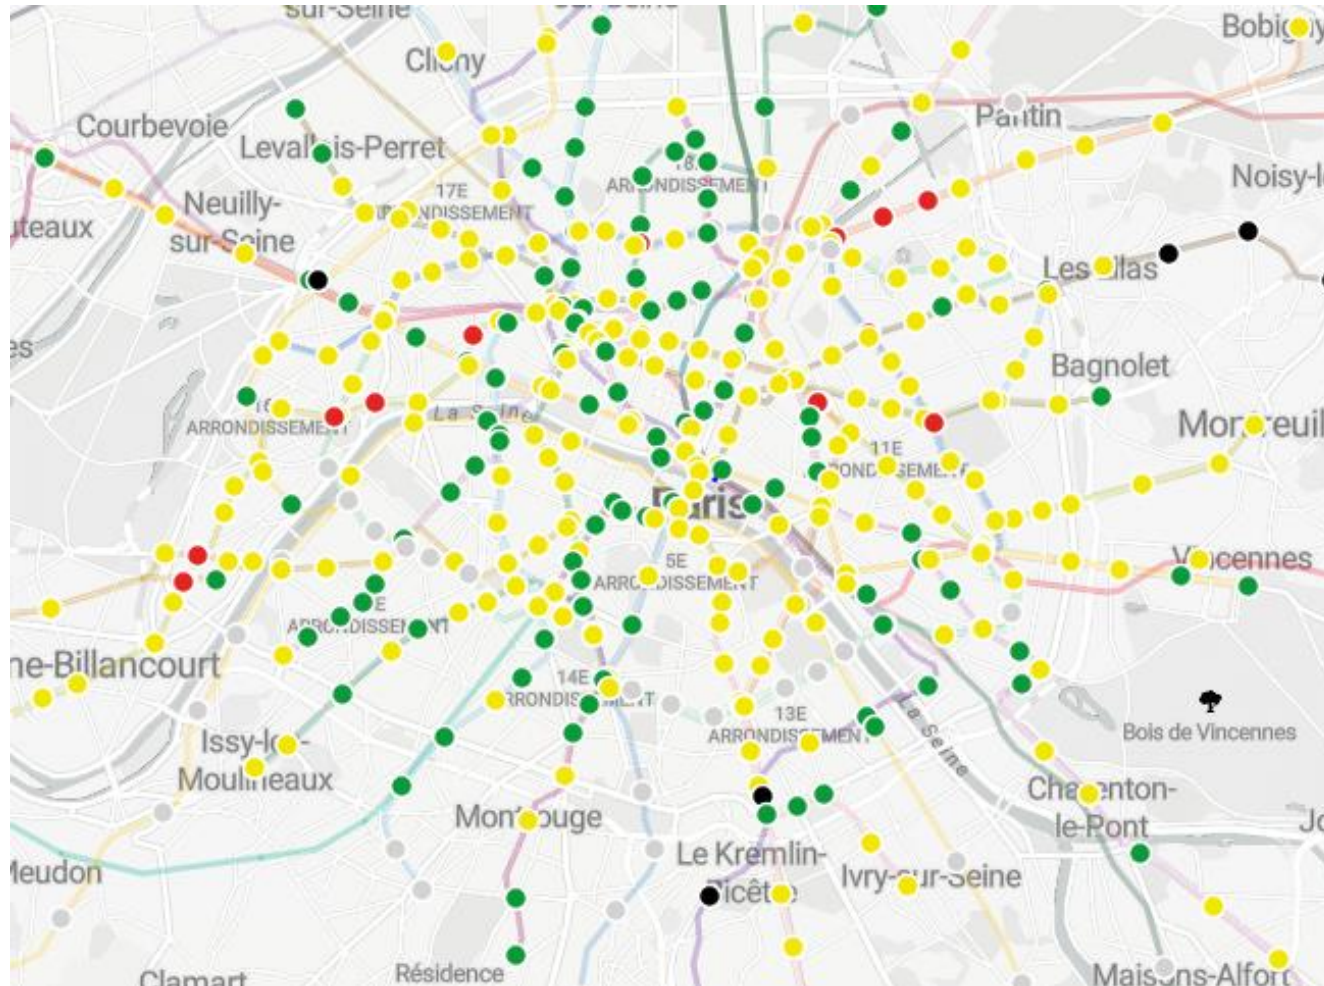

Cédric Aubouin, Île-de-France Mobilités (Paris Region)

A new strategy implemented since 2022

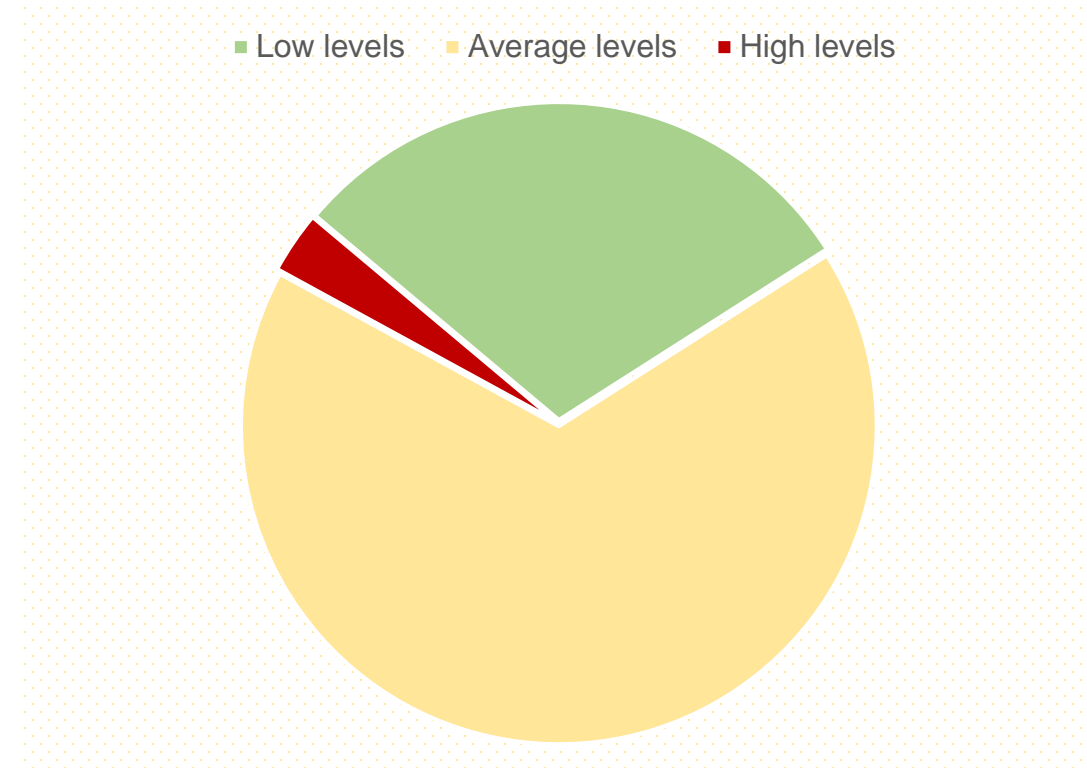

Air quality in the Ile-de-France transport network

	Low pollution
	Average pollution
	High pollution
	Overhead station
	No data available

Air quality in the Ile-de-France transport network

- 123 stations with **low levels of particle pollution** (30%)
- 276 stations with **average levels of particle pollution** (67%)
- 13 stations with **high levels of particle pollution** (3%)

Corrective actions to be implemented

- Reinforcement of ventilation fans
- Replacement of braking systems
- Implementing innovation
- Seize all upcoming opportunities

**Thank you for
your attention!**
