POLIS
CITIES AND REGIONS FOR TRANSPORT INNOVATION

Karlsruhe, 27.11.2024

AMBITIOUS CLIMATE GOALS FOR BW

Source: Ministry of Transportation Baden-Wuerttemberg

- No significant reduction of green house gas emissions
- The speed and impact of the transport transition must be increased

TRANSITION TO SUSTAINABLE MOBILITY

Technologies:

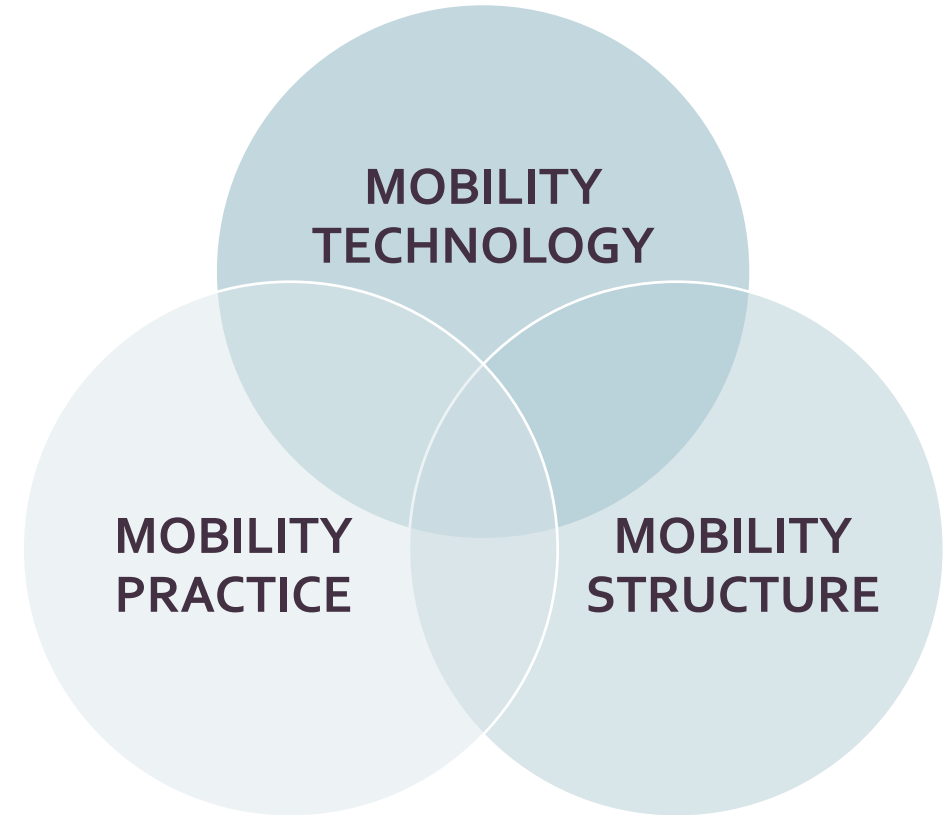

- Electric Vehicles
- E-fuels
- Autonomous Robo-fleet

Structures:

- Mobility as a service
- Public transport
- Bicycle lanes

Practice:

- Participative mobility development
- Mobility management
- power of social innovations from civil society

- At the moment focus on technology and structures
- New mobility practices cannot be 'implemented'

ZIMT.

Zusammen für soziale Innovationen der Mobilitätswende

ZIMT IN SHORT

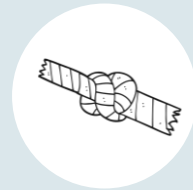

- Founded in 2023
- Network of civil society organisations, associations and multipliers engaged in the mobility transition in Baden-Wuerttemberg
- More than 50 engaged initiatives

Supporting local initiatives to gain visibility

Enhance their social capital by expanding their contacts into administration, politics, and the public

Connecting initiatives to learn from one another

SCIENTIFIC REFLECTIONS

BIKEBRIDGE.ORG

www.bikebridge.org

Using bicycles, the initiative seeks to build bridges—between organizations, participants, and volunteers, as well as within urban society. These bridges are designed to uphold the fundamental pillars of society: openness, democracy, tolerance, diversity, understanding, solidarity, inclusion, and participation.

RÄUBERBAHN PFULLENDORF

www.raeuberbahn.de

With support from the project coordinator and Pfullendorf railway management, volunteers are the driving force behind the community-run railway between Pfullendorf and Altshausen. They operate trains, guide passengers, and develop the service with passion, creativity, and teamwork. **A project by citizens, for citizens.**

SUPERBLOCK WEST, STUTTGART

SUPERBLOCK WEST

Since spring 2024, the City of Stuttgart has been conducting the 1.5-year traffic trial "Superblock West." By redirecting car through-traffic, new open spaces are being created within a defined area, featuring greenery, outdoor dining, and seating options. This initiative fosters social interaction and strengthens community ties.
